

MiniProject #2

Now that you have learned how to create a table and how to add images, it's time to put them both together. You will be creating your own **Battleship** game.

Start with unzipping the **Image** folder. **DO NOT REMOVE, ALTER, OR ADD ANYTHING TO THE FILES OR THE FOLDER.**

What you will need:

- An 11x11 table.
 - The first row has the numbers 1 - 10
 - The first column has the letters A - J
- You need to have only 1 of each ship. It doesn't matter which direction the ship is facing. [Click here for a visual of the ship directions.](#)
- The rest of the squares must be water.
- You must have the correct name for the alternative text for each image. I recommend using the ship name or 'water'.
- The file name will be lastnameBattleship

HINT: Copy (ctrl+c) and Paste (ctrl+v) will help make this assignment easier for you!!!!
